

Under the supervision of Professor Magdy Eldean, Dean of the Faculty of Pharmacy at the British University in Egypt and Dr. Khalid Naseratalla, the Faculty of Pharmacy gave those delighted to receive the Senior Student's Letter from The International School Of Elite Education (International School) Taha wanted to investigate the energies absorbed by different compounds that he had learned about in his B.Sc Chemistry class, while the Lab Facilities, unfortunately, were not available.

The Faculty of Pharmacy immediately opened its doors and helped Taha with his project - into Lab Facilities, to implement his ideas. From there, the school sent a thank you letter to the deans office on behalf of Taha who said if I wanted to investigate the energies absorbed by different compounds, I would have to do it myself because the facilities are not available in our School labs. I had to resort to the internet to find possible labs, but they were all expensive here in Egypt. I was about to stop my investigation and start a new one as I could not afford to pay for the lab fees. After some research, I found a lab in the USA called "Molecular Absorption and Ionization Laboratory". After much research, Dr. Khalid Naseratalla, who enthusiastically showed me around the lab, presented the high tech equipment and I thought it was perfect for my project. Dr. Khalid Naseratalla explained the absorption of light at different frequencies, Dr. Khalid and I discussed about chemical substances, and he demonstrated a plethora of novel facts really found intriguing. He explained some procedures in the manufacturing process of medicine and how it is made. I am very grateful to Dr. Khalid Naseratalla for his help and support. This was a completely new experience for me and it was a different type of learning I have never had before since in my previous cases I found a genuine scientific ambience saturated with enthusiasm in Egypt from my past experiences.

I would like to truly thank the BUE and the International School Of Elite Education for making this day a reality with precise planning and execution. I hope more schools will follow your example and help their students to do the same.

Dear Sir/Madam,

We would like to thank you for taking the time to read our letter and provide us with your advice. We are looking forward to the day under the supervision of Dr. Khalid Naseratalla, kindly the British University in Egypt, we will be able to complete our project.

I would like to sincerely thank Dr. Khalid Naseratalla for his support and guidance throughout this project. He has been a great source of knowledge and encouragement. His expertise and passion for science have inspired me to continue my studies in this field. I am grateful for the opportunity to work with him and learn from his experience. I am also grateful for the support of the British University in Egypt, which has provided me with the resources and facilities needed to complete this project successfully.

Thank you for your support and assistance. We look forward to further collaboration in the future.
